24 Volt Day/Night Sensor for Low Voltage DC LED lights up to 240 Watts

Product ID: 70361

Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).

Larson Electronics LLC manufactures a wide variety of products, including custom built to spec designs. The pictures displayed for this unit are a general representation of form factor for the product line and may not accurately represent this exact configuration in every detail due to custom builds and changes between similar products in our standard catalog. The specifics for this configuration are listed in the specification table and supporting documentation (CAD files, Dimensional Drawing, Name Plate Diagram, Wiring Diagram, etc.). This means that specific details (receptacles, plugs, wires, connections, mounting brackets, external finishes, etc.) may not be accurately represented in images vs specifications. Please review specifications and do not order based solely on images.

This day/night detecting sensor that automatically turns on an attached light fixture when the level of daylight drops. This photocell can detect ambient lighting and tell whether it is night or day outside. The sensor is also equipped with a test shield, allowing operators to override the sensor.

Specifications:

Power Source: 24V DC

Rated Load: 240 Watts on 24V DC

Working Temperature: -40° F to 158° F

Housing: Weatherproof Lexan

Photocell: Silicon sensor

Ambient-Light: 1 footcandle

Turn-on/off Ratio: 1:1.5

Time Delay: 5 seconds (off only)

Switch Type: Single pole, single throw

Contact Position at Night: Normally Closed

Lead Wire: 6" Moisture proof, color coated

Mounting: 1/2"-14 threaded (fits 1/2" knockouts), adjustable swivel arm

Dimensions:

Height: 4-18"

Width: 2.4"

Depth: 4"
