

### specifications

The 8 foot vertical cable manager shall consist of a metal backbone with cable management fingers that align with EIA rack spacing. The fingers shall be molded out of plastic and provide integral bend radius control throughout the entire length. Individual fingers shall be able to be removed without the aid of a tool. The backbone shall have pass through holes with rolled edges that provide bend radius control. The manager shall accept a metal, hinged door that can open to the right or left. The manager shall accept plastic slack management spools that can be repositioned as required. The vertical panel shall be able to manage all the cable on the rack without the aid of horizontal cable managers.

### technical information

<b>Dimensions:</b>	PRV696:	95.5"H x 6.0"W x 16.4"D (2426mm x 152mm x 417mm)
	PRVF696:	95.5"H x 6.0"W x 9.7"D (2426mm x 152mm x 246mm)
	PRV896:	95.5"H x 8.0"W x 16.4"D (2426mm x 203mm x 417mm)
	PRVF896:	95.5"H x 8.0"W x 9.7"D (2426mm x 203mm x 246mm)
	PRV1096:	95.5"H x 10.0"W x 16.4"D (2426mm x 254mm x 417mm)
	PRVF1096:	95.5"H x 10.0"W x 9.7"D (2426mm x 254mm x 246mm)
	PRV1296:	95.5"H x 12.0"W x 16.4"D (2426mm x 305mm x 417mm)
	PRVF1296:	95.5"H x 12.0"W x 9.7"D (2426mm x 305mm x 246mm)
	PRV1596:	95.5"H x 15.0"W x 16.4"D (2426mm x 381mm x 417mm)
	PRVF1596:	95.5"H x 15.0"W x 9.7"D (2426mm x 381mm x 246mm)

**Mounting options:** Mounts to all 8' Panduit EIA racks

**Packaging:** One vertical cable manager with assembly hardware and installation instructions: PRV8, 10, 12 and 15 series includes four each PRSP7 spools

### key features and benefits

<b>High-density</b>	Minimizes area required for network layout, freeing up valuable floor space
<b>Curved fingers</b>	Support cables as they transition to the vertical pathway eliminating the need for horizontal managers
<b>Individual fingers</b>	Individual fingers can be removed (without the use of a tool) to provide a large open area when creating cable pathways Aligns with rack spaces to simplify cable routing for moves, adds, and changes
<b>Integral bend radius control</b>	Maintains cable bend radius ensuring network performance and system reliability
<b>Slack management spools</b>	Organize and manage patch cord slack allowing for standardization of patch cord lengths
<b>Dual hinged door</b>	Opens to the left or right to allow easy access to vertical pathway without having to completely remove door
<b>Snap-on vertical retainers</b>	Can be placed on fingers to help retain cables in channel for improved cable management and appearance

### applications

PatchRunner™ 8 foot Vertical Cable Managers are designed to manage high-density networking equipment in up to half the area required by traditional cable management systems. Molded cable management fingers, with integral bend radius control, combine with Panduit 8 foot racks and angled patch panels to eliminate the need for horizontal cable managers. This frees up rack space for additional patch panels, active equipment, or cable pathways reducing the number of

racks that may be required for the network layout. The reduction in square footage combined with fewer components ordered, inventoried and installed results in significant cost savings for the network infrastructure. When used with Panduit connectivity, patch cords, and racks, the user receives a complete cable management solution that maximizes density while minimizing the area required for their network.
