SIDE CAR

With Great Lakes “side car” you have a place to keep all your cable management safe and organized.

We offer an external cable manager or “side car”, designed to serve as a 12” wide facilitator of your cable management needs. (Part # SC128442)

The External Cable Manager can be installed between two 84” ES Enclosures or at the end of a row as part of a “home run” networking solution. The side car has two adjustable vertical troughs, fingers, and attachment points for a variety of cable management accessories.

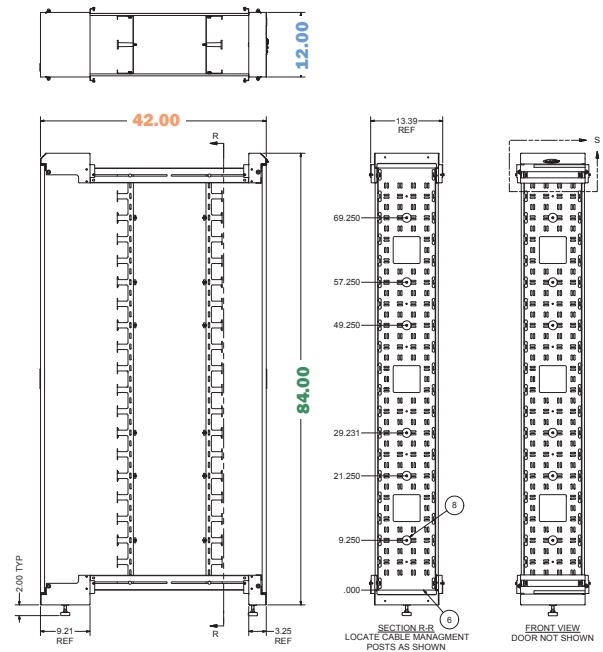

Great Lakes also offers an end panel for this “side car” which is easy to install and allows you to “dress out the row” when installed at its end. (Part #SCP8442)

If you require a specific type of “side car” beyond our standard offering, please feel free to call us at 1.866.TRY.GLCC (1.866.879.4522) and we’ll work with you to develop the right configuration to meet your needs. We have manufactured external side cars as narrow as 6” and as wide as 16” to meet the various needs of our customers. Please talk to us about your data and cable management challenges and together we’ll find the right solution.

At Great Lakes Case & Cabinet Co., Inc., we’ve been providing data center solutions for successful companies since 1985. The external cable manager is another one of those ways that Great Lakes can “Rack Your World.”
