

4-Channel Digitally-Encoded Video Multiplexer **Transmitter and Receiver**

COMPAK41M1

INCLUDED

The ComNet™ FVT41M1 and FVR41M1 multiplexers simultaneously transmit four channels of video over one optical fiber utilizing state-of-the-art digital encoding and decoding for high-quality video transmission. These environmentally hardened units are ideal for use in unconditioned roadside or out-of-plant installations. These units are completely transparent to and universally compatible with any NTSC, PAL, or SECAM CCTV camera systems. Plug-and-play design ensures ease of installation and no electrical or optical adjustments are ever required.

FEATURES

- > Digitally-encoded video transmission, transmits 4 real-time color video signals on one optical fiber
- > Exceptionally low video distortion with zero Performance Variation vs. Optical Path Loss
- > Compatible with all NTSC, PAL, or SECAM CCTV camera systems
- > Wide optical dynamic range: optical attenuators are never required
- > NTCIP compatible
- > Designed to meet full compliance with the environmental requirements (ambient operating temperature, mechanical shock, vibration, humidity with condensation, high-line/lowline voltage conditions and transient voltage protection) of NEMA TS-1/TS-2 and the Caltrans Specification for Traffic Signal Control Equipment.
- > Voltage transient protection on all power and signal input/ output lines provides protection from power surges and other voltage transient events.

- > Robust design ensures extremely high reliability in unconditioned out-of-plant environments
- > Bi-color (Red/Green) LED status indicators provide rapid indication of critical operating parameters
- > Hot-swappable rack modules
- > Interchangeable between stand-alone or rack mount use -ComFit
- > May be DIN-rail mounted with the ComNet model DINBKT4 adaptor (sold separately)
- > Lifetime Warranty

APPLICATIONS

> High-Performance CCTV (Fixed Video)
