Construction

Designed for the installation of LOW VOLTAGE Class 2 wiring, Arlington's non-metallic Low Voltage Mounting Brackets offer the fast, easy and cost-effective way to install CAT 5, fiber optic, cable TV, and communications cable in new construction.

Available in two styles, nail-on for wood studs, and screw-on for wood or metal studs, these low voltage brackets are made of non-conductive plastic to protect cable from damage.

- Eliminates pushback
- Competitively priced – cost less than plastic or steel mud rings
- Available in one and two-gang styles
