	Product Description	The GST keystone jack provides a common termination method to exceed Category 6 performance standards. The slim-line design's reduced depth means there is more space at the rear of the module which allows for the higher bend radius required for large diameter cables and that they can be used in shallow trunking applications.
	Technical Description	The design of the GST Keystone Jack has an integrated wire manifold and lid which provides integral strain relief for the cable and which enables the use of the GST Termination Tool for quick and easy installation on site.
