

Pin Tumbler Padlock Cylinder

There is a special cylinder used in the 5200GL. It has 5 pins in it and it is only 5 pins in length, the part number is APTC15.

The cylinder above is the standard pin tumbler padlock cylinder APTC14. When ordered with the part number APTC12 it is supplied with 5 pin tumblers and when ordered as part number APTC14 it will have 6 pin tumblers. Both sizes may be ordered with stainless steel pins by using the part number suffix 'S'. There is a special keyway used in the A748 lock and to get that keyway use part number APTC748 for a 6 pin cylinder. In all cases above, adding the suffix 'KZ' to the part number will get a zero bitted cylinder.

# Pins	Keyway	KD	Zero Bitted	Stainless Steel Pins
5	STD	APTC12	APTC12KZ	APTC12S
6	STD	APTC14	APTC14KZ	APTC14S
6	748	APTC748	APTC748KZ	APTC748

The APT2001 is supplied with shackle attached. Shackle removal is accomplished by removing the roll pin at the end of the cylinder.
