

The 1500 Series is also available in a **Complete One Box Solution**

1500 Series

The heavy duty, low profile solution for latchbolts

Shown with 1KM faceplate

The HES 1500 Series electric strike accommodates latchbolts in every brand of cylindrical or mortise lock designed to work with a 4-7/8" strike plate.

The HES 1500 and 1600 Series Electric Strikes set a new standard in the industry by offering dynamic integrated adjustability and field configurable options compatible with any cylindrical or mortise lock. The modular design of the platform makes stocking and installing easier with interchangeable faceplates and accessories. For the first time, the aesthetics of an electric strike are complementary to other surrounding door hardware and blend in with the opening due to the fully finished design, available in seven finishes.
