

Pace1PRM

IP and PoE+ over Extended Distance CAT5e or UTP Receiver

Description

Altronix Pace1PRM is a long range Ethernet receiver. It is powered by a PoE midspan, such as the Altronix Netway series, or by an endspan. The receiver passes the PoE(+) compliant power over the cable to Pace1PTM or Pace1ST transceiver which, in turn, passes this power to an enabled IP camera/device. These plug and play units facilitate cost-effective solutions for IP devices that need to be installed at distances greater than 100m. They also provide a simple way to replace legacy analog products with new IP devices over single twisted pair (UTP - Pace1PTM) or structured cable.
