

eBridge4SPT 4 Port PoE/PoE+ EoC Transceiver Switch

Description

Altronix eBridge4SPT 4-Port PoE/PoE+ Transceiver Switch is designed for use with eBridge100SPR (included in eBridge4SK Kit) to deliver data and power over coax cable. eBridge4SPT allows to upgrade existing infrastructure by replacing a single analog device with up to four (4) PoE/PoE+ devices. Data transmission and power over the Coax is possible up to 300m. Maximum range from headend to the PoE camera/device is 600m, taking into consideration that up to 100m of structured cable may be deployed at each end. eBridge4SPT enables cost-effective system upgrades and eliminates the costs and labor associated with installing new network cabling.
