PRODUCT DESCRIPTION

L-POM20A is a high-performance 20W public address column loudspeaker for outdoor use. It provides a broad frequency response range, low distortion and high sound pressure level for accurate and intelligible broadcasts of evacuation messages and high quality sound reproduction. Its low-profile, white color design blends easily with most interiors in locations such as hotels, conference rooms, cinemas, theme parks, factories and exhibitions.

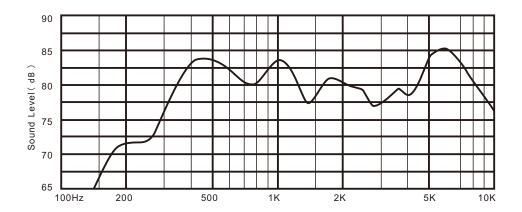

In case of a fire emergency, its aluminum

enclosure and high-temperature ceramic wiring connector protect the speaker's internal components from the increased heat often present in fire conditions, extending its ability to remain operational and broadcast important information during a fire emergency. In addition, the loudspeaker's swivel bracket is also made of aluminum, making them durable and corrosion proof. The loudspeaker is also supplied with a temperature fuse that protects it from overheating due to improper loading.
