ULTIMA[TM] ONE HD15 MALE TO TWO HD15 FEMALE SXGA MONITOR Y-CABLE

29610 | C2G

FEATURES & BENEFITS

The Ultima SXGA cable optimizes style, quality, and value in a cable specially designed for high performance. This y-cable splits the VGA signal to provide simultaneous display of the same picture. It is constructed from 3 individually-shielded 75 Ohm coax and 4 twisted pair cable to minimize crosstalk, noise, and other EMI/RFI interference. An aluminum undermold shield assists in reducing interference to meet FCC requirements, while a 360[D] solder-to-connector shell and cable braid create an end-to-end shielding solution for a noise-free connection. 24k gold-plated connectors provide maximum corrosion resistance for error-free data transfer. The charcoal gray cable jacket not only matches your case but disappears behind your desk leaving a clean organized look. The sleek design of the molded connectors makes them easy to grip. Finally, an ultra-flexible jacket and oversized thumbscrews make installation easy.e

Please Note: UXGA provides a screen resolution of 1600 x 1200 pixels. Not sure what resolution you need? See our **VGA resolution guide.**

SPECIFICATIONS
