HM-22 Headworn Mic

It has been designed to be worn around the head and to be hidden discreetly under the hair.

The headband is engineered from a hard wearing nylon composite, which has been specially selected to withstand robust use and yet can be adjusted to fit any user's head and ear shape. The high quality microphone, optimized for speech and vocals, is mounted on a boom that can be bent into shape to allow for optimum sound quality. A small membrane is inserted into the capsule housing which protects the capsule from moisture, make-up and any other dirt and can be replaced cheaply and effectively to allow the microphone to perform consistently at its best.
