## Maximum Protection for Core Data Center Equipment

### Overview

The Amphenol Telect Data Center Rack is the ultimate rack solution for core data center equipment. Amphenol Telect data center racks provide a non-seismic certified, highly durable and versatile platform for mounting equipment such as servers, routers, batteries and other crucial network components.

The data center rack features enhanced durability and the ability to hold a broad range of network equipment. Each rack is independently Zone 4 certified to hold up to 2,000 lbs. and 1,250 lbs. of network equipment. Battery shelves are also compatible, making the rack ideal for core equipment or as a heavy-duty battery rack.

### Primary Benefits

- Zone 4 certified to 2,000 lbs. and 1,250 lbs. —NEBS 6R-63-Core Level 3 certified
- Highly versatile – can be used for core equipment such as servers and routers; also accommodates battery shelves for use as a heavy-duty battery rack
- Adjustable front and rear rails for flexible equipment mounting in a variety of environments
- Robust design ensures reliable long-term performance
- Compatible with all standard rack-mount equipment
- Wide range of cable management options
