

Category 3 Patch Cable

Applications

All patch cord applications, in which Category 3 cable is used, are for horizontal distribution.

Specifications

- 24 AWG
- Stranded copper conductors
- Unshielded twisted-pair

Technical Information & Standards

- EIA/TIA 568 Cat 3 Crosstalk (NEXT)
- Attenuation values are 20% higher than the maximum attenuation for horizontal UTP cables of the same category.
- Field terminated cords should not exceed 20 feet.
