# DCN-MRT Transcription Module

www.boschsecurity.com

BOSCH

Invented for life

- ▶ Transcription of Meeting Recorder and CCS 900 files
- ▶ Can play PCM/WAV, WMA or MP3 audio formats
- ▶ Network sharing of audio files
- ▶ Easy copying or extracting (parts) of audio files

The DCN-MRT Transcription Module software is designed for playback and transcription of Meeting Recorder or CCS 900 recordings.
The DCN-MRT can play PCM/WAV, WMA or MP3 formatted files.

Functions

Transcription

The DCN-MRT transcription module is especially suited for playback and transcription of Meeting Recorder or CCS 900[1] recordings. The DCN-MRT is in fact the same software as the DCN-MR but without the recording function.
For easy control during transcription; start, stop, fast-forward/rewind, an optional transcription foot pedal is available (DCN-MRFP).

Playback

Recorded files can be played back for listening or transcribing. While the audio file is played the name of the speaker (if available) and time-information can be displayed in a window of the text editor. The DCN-MR Meeting Recorder can record two audio channels as stereo file. When the balance slider is in the far left position (or right), only the left (or right) channel is heard during playback. When the balance slider is in middle position both audio channels are heard (stereo) making this product ideal for interpreter training applications.

Extracting

Parts of recorded files can be easily extracted and optionally exported. In case the names of the speakers are available in the recording, easy retrieval of parts of a specific speaker are possible.

Ease of use

Although it offers many powerful features, the software is easy to use. The intuitive graphic user interface is divided into playback, visualization and files sections.

Installation/configuration notes

Installation

The DCN-MRT Transcription Module software is supplied on USB dongle and can be installed on one or more computers.
The software is designed to be used on a computer network. This gives the possibility, for example, to install a Transcription Module next to the DCN Central

Control Unit, while storage of the files is done in parallel on a server via the computer network. Persons responsible for transcription can have access from their computer via the network to the files on the server.

Licence
Licensing of the Transcription Module is done with USB dongle. The Transcription Module software can be installed on more computers. As soon the USB dongle is plugged-in, the software is ready to use with the applicable licenses. This makes it very flexible, with a minimum of effort and cost.
For demonstration purposes, the DCN-MRT software can be used to play recordings of five minutes maximum without the dongle.

Parts included

Quantity	Component
1	DCN-MRT Transcription Module
1	USB dongle (yellow)

Technical specifications

System platform	Windows 7 Home Premium (32 and 64 bits) or above or Windows Vista Home Premium(32 or 64 bits) or above
